USER EXPERIENCE DESIGNER

📅 with immediate effect   📍 DE - Rostock/remote

About Us

arivis is helping to shape the future by developing groundbreaking digital solutions. As a leading software developer for scientific imaging, we are driven by continuous improvement to excite researchers and to create the best work environment for our colleagues. Customer focus, innovation, and teamwork are at the core of our culture and the foundation of our success.

As an exclusive development partner of ZEISS we are pioneering the future of science and medicine by developing groundbreaking imaging solutions that enable researchers around the globe to gain completely new insights from their valuable data.
arivis is an international fast-growing company with headquarters in Rostock. Join us and experience exceptional opportunities and enduringly progress your career while working with and alongside experts. You'll feel at home from day one thanks to our inspiring team-orientated culture. Regardless whether you are entry-level, mid-career or a seasoned professional, you can truly make a difference with us.

Your Job

Perform as an interface between development and product management, as well as a voice for our users.

You would give support to the progression and improve proven modules. You have the opportunity to fundamentally shape new features and their operations through the entire process. At the same time, you would monitor the user experience of the entire arivis portfolio. You would preserve the continuity for interaction metaphors. Create new concepts that you implement with tactfulness. Face complex issues in order to make our users' daily tasks as simple and comprehensible as possible. If you think this challenge could captivate you in the long term, then you are the perfect match to our UX team!

Your Tasks

- Independently develop UX/UI concepts for different platforms (Windows desktop software, online platform, VR application)

- Apply and further develop design guidelines

- Develop wireframes and prototypes

- Plan, execute and evaluate user surveys

- Supervise implementation in the development team

Our Requirements

- Solid knowledge of UX and UI design principles

- Team player with an independent working style

- Excellent communication skills

- Willingness to deal with complex issues

- Good knowledge of Adobe XD or other prototyping tools

- Familiar with Adobe Suite or Affinity products

- Speak English and German fluently

- Experience with frontend development and WPF is welcome
